

Translational Research to Inform Practice

SUBMISSION DEADLINE: SEPTEMBER 13!

For the 2025 Annual Meeting of the American Spinal Injury Association, we are seeking **Translational Research to Inform Practice (TRIP)** abstract submissions, addressing bench to bedside to bench translational research (see definitions below). Each submission should have a problem/system focus and include a basic and/or pre-clinical researcher AND a clinician and/or clinical researcher. Inclusion of at least one early career presenter (Assistant Professor or lower) is encouraged.

The meeting will be held at the Scottsdale Plaza in Scottsdale, Arizona. Abstracts are due **September 13!**

We look forward to your TRIP submissions!

For the purpose of this abstract call, we define:

Bench to bedside translational research as the path taken to translate basic science/pre-clinical animal research into clinical research and/or practice, or to increase our understanding of important disease processes.

Bedside to bench translational research as the movement of ideas/concepts/questions from the clinic to basic science/pre-clinical animal research in a way that drives the development of specific testable hypotheses in appropriate animal models, that will ultimately improve existing interventions or develop new interventions, models or approaches in humans.

For more information please contact:

Laura Krisa, PhD laura.krisa@jefferson.edu or Ryan Solinsky, MD Solinsky.Ryan@mayo.edu.

Begin the submission process [online here](#). A program and conference updates will be available on the [ASIA website](#).
