

ASIA 2026 Conference

Clinically Tailored Sessions

APRIL 24 – 26
 PRECOURSES
 APRIL 23

Want to Stay Ahead of the Field in Spinal Cord Injury Care and Unlock Cutting-Edge Insights into Evidence-Based Strategies, Emerging Therapies and Hands-on Solutions to Improve Patient Outcomes? Join us at the ASIA 2026 Conference, Clinically Tailored Sessions, Curated by Clinicians for Clinicians.

COURSES

Clinical

Course 1: Accurate Neurological Classifications Using Only One Third of The Exam: How to Perform the E-ISNCSCI Version 2

Course 3: An Update on the Diagnosis, Management, and Research Directions for Degenerative Cervical Myelopathy (DCM)

Course 5: Core Practice Principles: Assessing and Treating Trunk Impairments Post-SCI

Course 11: Employment after Spinal Cord Injury/ Disorder: Advantages, Challenges, and Opportunities

COURSE 13: Clinical Decision-Support in Spinal Cord Injury: Opportunities and Limits

COURSE 14: Interactive Wheelchair Skills Lab

COURSE 15: Game Changers: Adaptive Recreation as a Pathway to Better Outcomes after Spinal Cord Injury

Course 16: Neuropathic Pain after Spinal Cord Injury: Challenges, Lessons, and New Directions

Clinical and Research

Course 3: An Update on the Diagnosis, Management, and Research Directions for Degenerative Cervical Myelopathy (DCM)

Course 6: SCOPE - Making Sense of Discomplete Spinal Cord Injury

Course 8: From Lab to Clinic: Harnessing Non-Invasive Spinal Stimulation to Recover Motor and Autonomic Control post-SCI

Course 9: PLEX Voices: Projects to Model a Future for Successful Partnerships in Research

Course 10: Integrating Clinical and Instrumented Measures to Guide Rehabilitation of Individuals with Spinal Cord Injury

Course 19: Turning Evidence into Action: Implementation Strategies for Motor Restoration and Spasticity, Bone Health, and Rehabilitation Engagement

GENERAL SESSIONS

Clinical

General Session 2: Pain, Pain Go Away: Insight into Pediatric SCI and Pain

General Session 3: Go With the Flow: Innovations in Respiratory and Urological Care

General Session 4: Perspectives and Priorities for Rehabilitation and Recovery after SCI

Clinical and Research

General Session 1: Building Better Metrics: From Sensory Exams and Trunk Control to Quality of Life and More

General Session 5: Reimagining Independence: Patient-Centered Advances in SCI Assessment, Tech, and Therapy

General Session 6: Eat, Stim, Burn: The Ups and Downs of Energy Balance

General Session 7: Rehabilitation Remix: From Stories to Statistics

General Session 8: Innovative Approaches to Optimize Function and Participation

General Session 9: The Rhythm of the Heart: 'Stewarting' the Beat of SCI Cardiovascular Health
